*New and Unique
Floor Protectors*

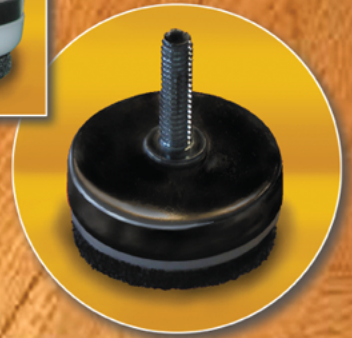

FLOOR PROTECTORS

*The #1 Choice of restaurants and
commercial property owners who demand
the ultimate in protection for their
expensive hardwood and tile flooring.*

Applied to tables and chairs, FeltLok™ is a unique two-piece floor protector, consisting of an adhesive backed Velcro® hook material and attached felt pad that can easily be replaced when it gets dirty and worn.

Protect Your Hard Surface Floors

with  **FeltLok™**
FLOOR PROTECTORS

FeltLok is a NEW and UNIQUE two component floor/surface protector that incorporates the Velcro® hook used in conjunction with a reattachable, replaceable interwoven felt pad.

The **FeltLok** floor and surface protector system can be directly attached to a chair or furniture leg and is also available pre-assembled to nail-on or thread-on hardware.

Hanes & Associates Manufacturing

Protect your hard surface floors

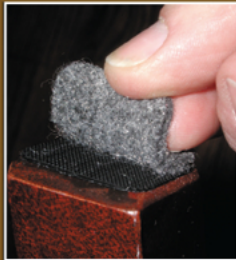

Adhesive backed, nail-on and thread-on **FeltLok™** protectors offer fast attachment with no surface preparation. If the hook component is damaged and the set needs to be replaced, no sanding or sealing is required, simply remove the old set and any residual adhesive and attach the new set. With regular maintenance typically only the felt pad will need to be replaced. The steel and nylon surface of the nail-on, thread-on hardware provides an excellent bonding surface for the **FeltLok** Sets.

Installation and Maintenance: Replace pads when wear, embedded grit and other contaminants dictate. Floor surface, climate/weather conditions, traffic/usage, pad size and floor maintenance impact the effective life of the pad.
